

Third Party Installation Authorization

I (vehicle owner name) _____ authorize AlcoAlert Interlock (AAI) and its authorized service centers to install, service and remove an Ignition Interlock on to my vehicle listed below.

I understand all operators of this vehicle will be required to operate and pass a Breathalyzer test each time the vehicle is operated.

This device will remain on the vehicle until the DMV/MAU gives authorization to remove or transfer, or the mandated driver will be "violated" out of the program and will loose all driving privileges at a minimum.

When properly maintained, this device does not interfere with normal operation of the vehicle. If maintenance /service is required, a bypass code may be issued directly to a BAR certified auto repair service at no cost to the vehicle owner by calling the below number.

Should I wish to have this device removed for any reason. I must request that AAI remove the device with a minimum 72 hour notice, which will then notify the client of this pending action.

Account balance and removal fees may or may not apply and can be confirmed at any time by contacting AAI at 760.269.7600.
